

YINGFAN®

GEOCOMPOSITES

Geotextile-geomembrane composites
Geotextile-geonet composites

Professional Manufacturer
Environmental Protection Expert

www.shanghaiyingfan.com

We provide one-stop solutions for geotechnical materials: geotechnical product manufacturing and installation, product R & D, engineering design within the scope of qualification, supply of related products and equipment, and ODM/OEM services.

One Layer of Geomembrane and One Layer of Geotextile
One Layer of Geomembrane and Two Layers of Geotextile

- ☑ Drainage
- ☑ Protection
- ☑ Easy installation
- ☑ Strong tensile strength
- ☑ Resistance to puncture
- ☑ Resistance tear propagation
- ☑ Resistance to acid and alkali

Geotextile-geonet composites

PRODUCTS

Geocomposite is a composition / combination of two or more geosynthetic materials to perform multiple number of geosynthetic functions for specific civil engineering application(s) the purpose of providing this composition is to minimize the application costs whereas the technical properties of the soil or the geotechnical structure are enhanced.

This specific category brings out the best creative efforts of the engineer and manufacturer. The application areas are numerous and constantly growing.

Landfill

Vertical drains

Basement walls

Edge drains
