

One of the most important elements of our railed type automatic carpet washing machine is that it is providing water and electricity economic consumption. We use stainless steel, chrome and body rotation to ensure the longevity of the automatic carpet washing machine. Carpet washing machine during the wash does not leave stains on the carpet and does not damage the fur of the carpet. That is to say: It cleans carpet from stains such as dirt, dust and bacteria has penetrated into, and cleans fur without damaging the carpet. Also with an excellent brushing feature machine has a rake feature for cleaning out loosened dirt. Our fully automatic carpet cleaner machines are based on the escalator systems. Our automatic carpet washing machine bands on advancing: shampooing, brushing, making the rinsing process. Depending on the type of carpet you wash, type of yarn and weaving techniques you can select your preference from the program menu and can start a carpet washing process.
