

Automatic Handle Applicator Machine Model No 900

Quality is our Commitment

Padideh Pars is an Iranian leading manufacturer of packaging and bottling machines for filling beverages in PET and glass bottles. The company designs and manufactures rinsing, filling and capping machines with rotary concept. Rotary lines are suitable for high-speed tasks of up to more than 20,000 bottles/hour, including carbonated and non-carbonated filling systems for beverages. Further steps in beverage production line, this company designs and produces roll-fed labelling machines with hot melt system, automatic handle applicator and complete conveying system. Over its 32 years of existence, Padideh Pars' success is based on products and services that offer added value for more than 250 valued domestic and foreign customers. We stand for more than remarkable quality and have set ourselves ambitious long-term growth in technological leadership.

Automatic handle applicator machine-Model No 900 applies adhesive carry handles on shrink film packs.

Production Speed:

30 packs/minute.

(To be upgraded up to 60 packs/minute)

Operation System

■ **Minimum Power Consumption:**

The machine mechanism is designed in a way to use minimum power less than 1.3 Kw.

■ **The Optimum Use of Production Line Space:**

Space is always at a premium in the production line. The machine size is made to fit in a minimum production line space.

■ **Control System:**

Model No 900 control system is equipped with PLC system and alphanumeric multilanguage LCD display.

■ **Machine Safety:**

The machine has stainless steel safety guards and sliding doors equipped with see-through safety glass in order to increase the safety of the operator during the machine operation.

Advantages

■ Easy Carrying:

Customers prefer to select products with carry handle due to the easy carrying of full pack.

■ Increased Sales:

The carry handles easily driving more volume at the point of purchase. The result is increased sales.

■ Reduced Cost:

Adhesive carry handles cost considerably less than alternative solutions.

■ Improve Customer Relationship:

Marketing messages can be printed on carry handles labels, in order to improve communication with customers.

■ High Flexibility:

The machine is capable of applying adhesive carrying handles on a wide variety of packs.
