GAGARIN MANUFACTORIES LLC

ABOUT US

This year marks 10 years since we lovingly produce and supply to the Russian market natural, high-quality and delicious chocolate in the category of "pure composition". During this time, we have come a long and exciting way, starting with the idea of social entrepreneurship — to create natural sweets for ourselves and our loved ones. Today we are proud of our professional expertise in the field of chocolate on honey, which allows us to offer products that meet the highest quality standards.

Over these 10 years, our values have remained unchanged. We still create our products as if we were making them for the closest person. Our clients are like-minded people who share our commitment to taking care of ourselves and the environment. Honesty, transparency and the absence of compromises in taste are the principles that we put at the forefront. We are confident that real concern for health and well-being should be manifested not only in the quality of the ingredients, but also in the very philosophy of our production.

We scrupulously select suppliers of our ingredients, paying special attention to the exceptional minimalism of the formulations. We avoid the wonders of industrial processing and strive to preserve the naturalness of all components so that each of our products is truly healthy and tasty.

Our factory is located in the picturesque village of Gagarinskaya Novoselka in the Yaroslavl region, and it is here that we draw inspiration to create our chocolate masterpieces. The nature around us fills our products with unique energy, which makes them not only a treat, but also a source of joy for our customers. We are sincerely glad that over the years we have managed to create not just chocolate, but a whole philosophy based on love for natural products and respect for the world around us.

PRODUCT FEATURES

We use honey instead of sugar, which makes our products more natural and healthy. Honey not only adds sweetness, but also enriches the taste by adding delicate floral notes. In our recipe, we adhere to a simple and understandable composition consisting of a minimum of ingredients. This allows you to preserve the true taste of each component and avoid unnecessary additives. The rich chocolate taste will pleasantly surprise even the most discerning gourmets. We are sure that everyone will be able to appreciate the quality and richness of our product by enjoying it at any time of the day.
