

INOTECK

INOTECK COMPOSITE LLC

PRODUCTION OF ALUMINOSILICATE MICROSPHERES

INOTECK

INOTECK COMPOSITE LLC

ABOUT THE COMPANY

We are a manufacturer and universal supplier of various types of hollow aluminosilicate microspheres (cenosphere, ceramic microsphere, metasphere, ziosphere), glass microspheres and glass microballoons, as well as innovative products based on them.

We develop directions on composite coatings of hollow aluminosilicate microspheres and glass microballoons with polyurethane and metals.

Hollow aluminosilicate microsphere sizes range from 0 to 500 microns, glass microsphere sizes range from 0 to 125 microns and glass microballoon sizes range from 0 to 1200 microns.

We utilize the special characteristics of aluminosilicate microspheres, glass microspheres and glass microballoons that allow us to apply these products to a wide variety of industries - oil and gas and refractories, composites and paints, construction and medical, plastics and synthetic rubber and many more.

We offer the following products:

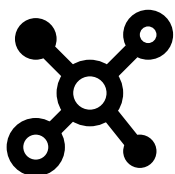

- Aluminosilicate microsphere thin-walled gray and white - 17 kinds of highly classified zeeosphere - 0-50, 5-75, 5-100, 5-150, 5-200, 5-500, 20-100, 56-100, 100-150, 100-200, 100-300, 100-500, 150-180, 150-210, 150-210, 150-250, 180-250, 250-500 microns
- Aluminosilicate microsphere thick-walled gray - 6 kinds of highly classified zeeosphere - 10, 20, 50, 70, 150, 250 microns
- Glass microsphere - 8-65, 2-80, 2-85, 2-90, 2-110, 2-120, 15-120 microns
- Glass microballs - 40-100, 100-315, 100-600, 200-450, 400-850, 800-1200 microns
- High-temperature water-resistant thermal insulations
- Energy-saving heat-insulating composite coatings of new generation

OUR ADVANTAGES

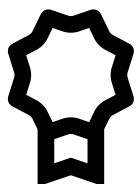

WIDE RANGE OF PRODUCTS

- Aluminosilicate microspheres (cenosphere, ziosphere).
- Glass microspheres and microballoons of different fractions.

UNIQUE MATERIAL PROPERTIES

- Durability and heat resistance.
- Lightweight and chemically inert.
- Can be used in extreme conditions.

HIGH QUALITY PRODUCTS

- Our products comply with international standards and undergo strict control at all stages of production.

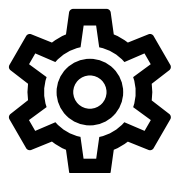

FLEXIBLE TERMS OF COOPERATION

- Delivery in convenient packing (big bags, paper sacks).
- Possibility of delivery by all types of transportation.

EXPERIENCE AND REPUTATION

- More than 12 years of successful work in the market.
- Hundreds of satisfied customers in Russia and abroad.

INNOVATION AND INDIVIDUAL APPROACH

- We actively develop new products and offer solutions tailored to the specific needs of each client.

INOTECK

INOTECK COMPOSITE LLC

OUR PRODUCTS

ALUMINOSILICATE MICROSPHERES

Universal lightweight filler with high temperature resistance and low density. Used in thermal insulation, building materials, composites and refractories.

GLASS MICROSPHERES

Strong and chemically resistant microspheres for the production of paints, plastics and cosmetic products.

GLASS MICROBALLS

Reflective materials for road markings, composites and polymers.

TERMS OF COOPERATION

Possible delivery volumes:

\$750-1100/mt, FCA. DAP and FOB are also possible, depending on the Customer's needs. Any frequency, according to the approved shipment schedule - weeks, months, annual delivery plans.

Possible volumes of deliveries and their frequency:

Up to 2000 tons per year

Minimum batch:

500-600 kg (one bag).

Timing of shipments of batches of products:

There is an optimal stock of products in the Warehouse. Production works all year round. Delivery terms from one day

Warehouse Stock:

In stock

Possible payment terms:

100% prepayment

Payment procedure:

Payment in rubles at the exchange rate of the Central Bank of the Russian Federation on the day of payment

Terms of post-sale and warranty service:

One year warranty for the delivered goods, provided storage conditions are met

Location of the shipping warehouse:

Moscow
Podolsk
